## Education

|                                                                                                                       |             |
|-----------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Bachelor of Technology in Computer Science Engineering (Cybersecurity and IOT),</b> <i>Amity University ,Noida</i> | 2023 – 2027 |
| CGPA- 7.42                                                                                                            | Noida       |
| <b>Senior Secondary,</b> <i>Lovely Public Senior Secondary School(CBSE Board)</i>                                     | 2023        |
| 78%                                                                                                                   |             |
| <b>Secondary,</b> <i>Lovely Public Senior Secondary School(CBSE Board)</i>                                            | 2021        |
| 92%                                                                                                                   |             |

## Skills

### Technical skills

- Programming Languages : Python , C++
- Web Dev: HTML, CSS
- Databases & Backend: MySQL
- Tools: Git/Github, Linux
- Libraries: NumPy, Pandas, Matplotlib
- CS Fundamentals: OOP, DBMS, SQL, DSA, OS, COA, System Design

### Soft skills

- Ownership Mindset
- Self-driven
- Problem- Solving
- Team Collaboration
- Time Management
- Continuous Learning
- Adaptability

## Projects

**Face Detection** , ( *OpenCV, Dlib, MediaPipe, Python, CSV* )  
Built a Face Recognition Attendance System using Python, MediaPipe, and OpenCV that automatically detects faces in real-time and logs attendance in a CSV file, ensuring one entry per person per session.

**Chat Encryption** , ( *Python Cryptography Library (AES/RSA) Socket Programming* )  
Developed a secure chat encryption system to ensure confidential communication between users. Implemented encryption and decryption mechanisms using cryptographic algorithms to protect messages from unauthorized access and maintain data privacy.

**Job Recommendation System** , ( *Python Pandas NumPy Scikit-learn Jupyter Notebook* )  
Developed a Job Recommendation System that suggests relevant job roles based on user skills using Natural Language Processing. Implemented TF-IDF vectorization and cosine similarity to match user skills with job descriptions. Built a Flask web application to provide real-time job recommendations through a user-friendly interface.

**NGO Website for KindBeings Organization** , ( *HTML, CSS* )  

- Developed a responsive website for an NGO to showcase initiatives, projects, and volunteer opportunities.
- Designed multiple webpages including Home, About, Contact, Projects, Women Support, and Volunteer sections.
- Implemented structured navigation and responsive styling using HTML and CSS.

**AI-Based WhatsApp Group Activity & Sentiment Analyzer** , ( *Python, Streamlit, Pandas, Plotly, TextBlob, NLP* )  

- Developed an AI-based WhatsApp chat analyzer to generate user activity insights and sentiment analysis.
- Built an interactive Streamlit dashboard with chat analytics and visualization features.
- Implemented multilingual/Hinglish chat understanding using NLP techniques.

## Certificates

**Deloitte - Cyber Job Simulation**   
Completed Deloitte's Cyber Job Simulation on Forage, gaining hands-on experience in cybersecurity operations and threat analysis. Worked on real- world style tasks involving incident assessment and risk reporting, demonstrating problem-solving and analytical skills.

**NPTEL**   
**Python for Data Science:** Successfully completed the NPTEL online course Python for Data Science offered by IIT Madras. Gained foundational knowledge in Python programming, data handling, and analytical problem-solving for data-driven applications.

**Web Development Internship – KindBeings NGO**   
Developed and designed a multi-page NGO website using HTML and CSS to present organizational activities and volunteer programs.

**Generative AI for Beginners - UDEMY**   
Learned fundamentals of Generative AI, Large Language Models (LLMs), prompt engineering, and AI tools.

## Extracurriculars

**Volleyball Player**  
I actively participated in volleyball, representing my college team in various tournaments and competitions, demonstrating teamwork, discipline, and sportsmanship.

**Volunteer & Technical Contributor | Kind Beings NGO**  

- Participated in tree plantation, animal welfare, and educational support activities.
- Designed and developed a website to promote NGO initiatives and improve digital visibility.
- Assisted in organizing and documenting community service events.
